

**Anita Wichmann**  
Research Scientist  
Chr. Hansen A/S, Denmark

**Biography**

Anita Wichmann is a Senior Scientist in Microbiome and Human Health Innovation at Chr. Hansen, where her focus is on understanding the mode-of-action through which probiotic bacteria exert beneficial effects on host health.

She has a Ph.D. in Molecular, Cellular and Developmental Biology from the University of Colorado-Boulder and did postdoctoral research with Fredrik Bäckhed at the University of Gothenburg, where she studied how the gut microbiome affects host metabolism in animal models.
