

Grégoire Chevalier

Associate researcher
Institut Pasteur, France

Biography

Grégoire Chevalier pursued his PhD in the lab of Pr. Roland Liblau in Toulouse, France, at the crossroad of immunology and neurosciences, studying the mechanisms of neuronal damage caused by neuroinflammation.

He moved for his postdoc to the Institut Pasteur in Paris, joining the lab of Gérard Eberl where he focuses his research on the interplay between commensal bacteria and the host, especially the brain. To this regard, he developed a consortium on the topic Microbes & Brain that gathered neuroscientists, immunologists and microbiologists of the Institut Pasteur.
