

Gunilla Önning
Senior Scientist
Probi AB, Sweden

Biography

Gunilla Önning is Senior Scientist at Probi AB and adjunct Professor in Biomedical Nutrition at Lund University. She received a PhD at Lund University in Applied Nutrition and has been working with nutrition research at Lund University for over twenty years with focus on dietary fiber.

Gunilla Önning joined Probi AB in 2005 and her main working field at Probi is the development of scientific documentation for probiotics including *in vitro* trials and clinical trials. Examples of health indications she has been working with are effects of probiotics on gut health (incl. the microbiome), iron status and recently also the gut-brain axis.
