

Shahram Lavasani
Founder and CEO
ImmuneBiotech AB

Biography

Shahram Lavasani holds a Ph.D. degree from Lund University in Medical Inflammation Research where he studied the immunoregulation and novel immunotherapies in multiple sclerosis. He is a skillful immunologist with many years of research expertise on gastrointestinal complications in autoimmune and chronic inflammatory diseases.

Focusing on Gut-Brain axis he has pioneered research in multiple sclerosis (MS: brain inflammation) by demonstrating increased intestinal permeability and targeting the gut using combination of probiotic bacteria. Shahram has collected new probiotic bacteria from innovative biological sources and developed the proprietary lactobacilli library and has solid know-how in the scientific selection methods and combination of strains to achieve optimal therapeutic potential.

He has designed ImmuneBiotech's drug candidates by careful and multiple selection methods to identify potential strains and formulations for the optimal therapeutic management of the diseases.
