

Alastair MacDonald – Vice President Real World & Late Phase

Alastair MacDonald, BSc. (Hons.), FICR. Vice President, Real World and Late Phase Business Unit. Alastair has 25 years of experience in the biopharmaceutical development sector, joining INC Research in 2016. Prior to this, he was the Global Delivery Director for Medical Evidence and Observational Research at Astra Zeneca with responsibility for the generation of Evidence, in both pre and post approval drugs, required to support core clinical development programs and prepare for reimbursement. This insight into the generation of Real World Evidence and peri-approval requirements is his focuses at INC Research, working to help and support our clients maximize value.

He spent 15 years at Astra Zeneca in a range of positions, including Clinical Leader within the UK local affiliate, moving subsequently to the role of European Study Program Director for Oncology and Infection, with accountability for the regional delivery of pivotal phase I-III oncology programs before undertaking his Real World Evidence Delivery Director position within Global Medical Affairs.
