Our worldwide presence

Coronavirus – three points

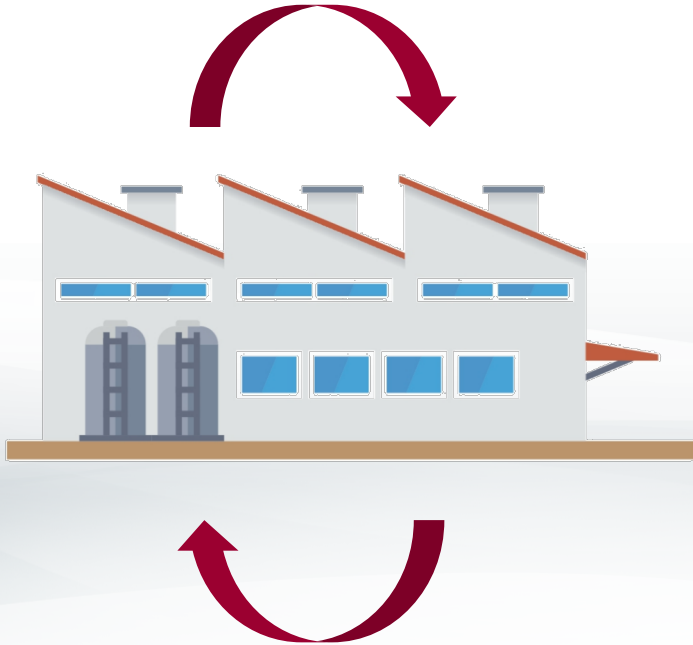

1. Change in demand patterns
2. Working under new conditions
3. Spotlight on advantages of single-use devices

1) Change in demand patterns

1) Change in demand patterns

Pressure on manufacturing

Pressure on supply chain

2) Working under new conditions

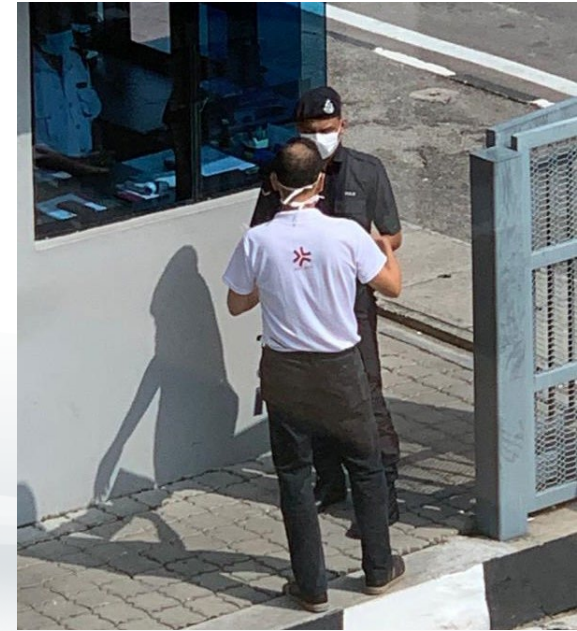

Keeping up production under safety measures

Sourcing 200,000 protective facemask to keep production running in Ambu China

2) Working under new conditions

Keeping up production under safety measures

Explaining to law officer that Ambu Malaysia is exempt from national movement control order

2) Working under new conditions

Keeping up production under safety measures

Keeping distance in U.S. production

Distancing measures in cafeteria

2) Working under new conditions

Increased hygiene measures

Wash your hands

Wash your hands with soap and running water when hands are visibly dirty

If your hands are not visibly dirty, frequently clean them by using alcohol-based hand rub or soap and water

Protect others from getting sick

When coughing and sneezing cover mouth and nose with flexed elbow or tissue

Throw tissue into closed bin immediately after use

Clean hands with alcohol-based hand rub or soap and water after coughing or sneezing and when caring for the sick

Protect others from getting sick

Avoid close contact when you are experiencing cough and fever

Avoid spitting in public

If you have fever, cough and difficulty breathing seek medical care early and share previous travel history with your health care provider

2) Working under new conditions

No travel and working from home

2) Working under new conditions

No access to hospitals

There is a high number of reports of corona patients that have died of sudden cardiac arrest without serious lung complications. Therefore, Herlev- Gentofte Hospital in Copenhagen have decided to conduct a study to investigate if cardiac arrhythmias could be an overlooked complication of COVID-19. At Ambu, we are proud to support this study and have donated 36,000 ECG electrodes.

Could the coronavirus have an effect on cardiac arrhythmias?

A new study with 36,000 ECG electrodes

2) Working under new conditions

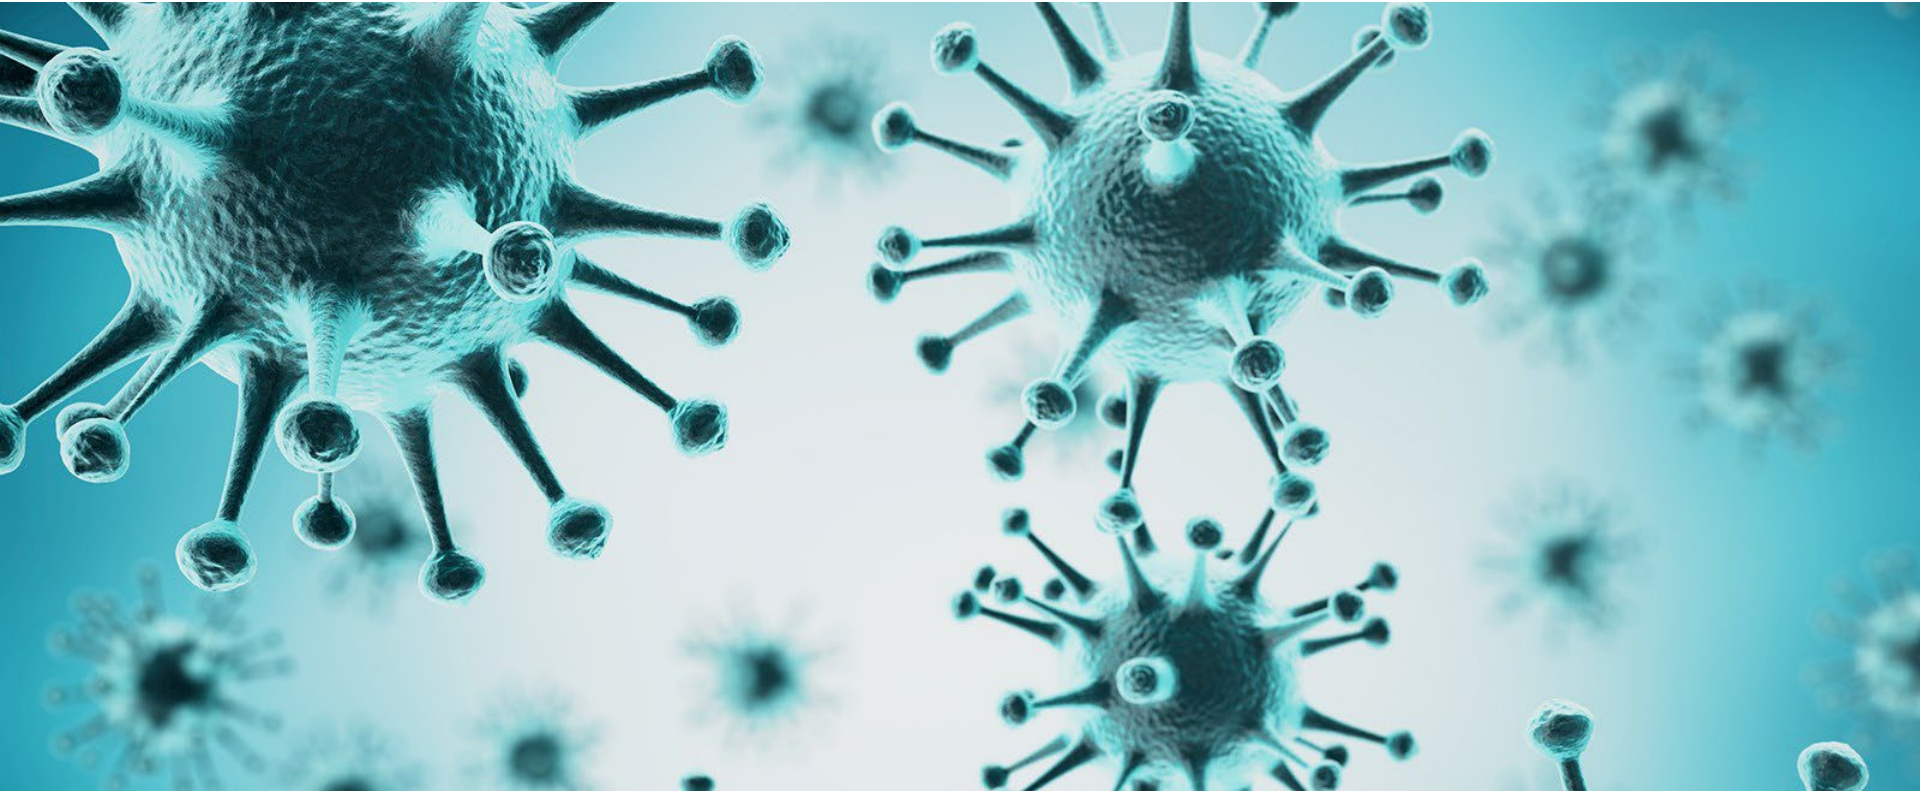

No access to hospitals

2) Working under new conditions

- Not had to lay off employees
- Not had to send employees home
- Not had to ask employees to take a pay-cut

3) Spotlight on advantages of single-use devices
